

Northwestern Medicine Student Health Center at NIU Offering JYNNEOS™ Vaccine by Appointment Only for Students, Faculty and Staff

The JYNNEOS™ vaccine is a two-dose vaccine given under the skin 28 days apart.

Close contacts to cases should be offered vaccine, as well as any persons qualifying for pre-exposure vaccination (e.g., persons who work in labs doing MPV testing). Persons who have had MPV (monkeypox) do not need to be vaccinated at this time.

Enhanced eligibility criteria are as follows:

- Anyone regardless of sex, gender, or sexual orientation who:
 - Had recent skin-to-skin contact or intimate contact with someone diagnosed with MPV.
 - Exchanged goods or services for sex in the last six months.
 - Is living with HIV, especially persons with uncontrolled or advanced HIV disease.
 - Is eligible or currently taking PrEP (pre-exposure prophylaxis) to help prevent infection with HIV.
- Gay, bisexual, and other men who have sex with men, transgender, or nonbinary people who in the past six months have had:
 - A new diagnosis of one or more nationally reportable sexually transmitted diseases (i.e., acute HIV, chancroid, chlamydia, gonorrhea, or syphilis).
 - More than one sex partner.
- Sexual partners of people with the above risks.
- People who anticipate experiencing the above risks.
